Why Ulti Group?

Ulti Group operates guided by a culture of excellence, always striving to stay one step ahead, offering the best possible service and the highest quality products and installation

“You have provided excellent service and it has been my pleasure to deal with your company.”

“The workman I had certainly knew his job & I thank him every time the door is opened.”

“many thanks for a quality job and excellent customer service throughout”

The Service: Reliability and honesty is Ulti Groups’ core principles where every promise is fulfilled and every request is attended to.

The Installation: Trained installers and service technicians ensure faultless installs and Ulti Groups’ many years of experience through different areas of New Zealand means we can and will provide a solution for almost every situation

The Products: Ulti Group offers a complete range of gates and garage doors including custom designs with the ability to cater to individuality

The Team: Ulti Group recognizes that its success relies on the dedicated input of its team. To this end management have created a positive, enthusiastic working environment, which encourages team spirit, a culture of working together, and commitment. Ongoing training in both administration and technical areas ensures we consistently provide the best quality service to our clients

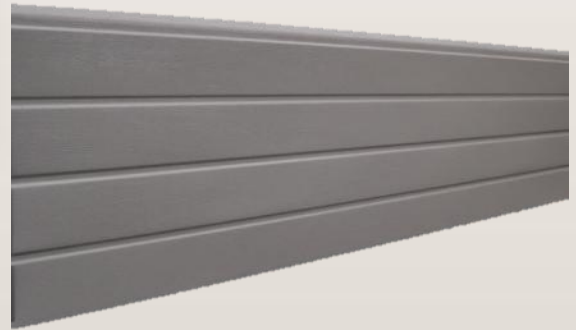

Steel Doors

RIBLINE PROFILE

Surface Finishes: Woodgrain
Smooth (0.60mm gauge steel)
Woodtech

Traditional weatherboard look which also is a good match with roller door profiles.
0.45mm gauge steel
Available in standard coloursteel colours, powdercoated or zinalume.

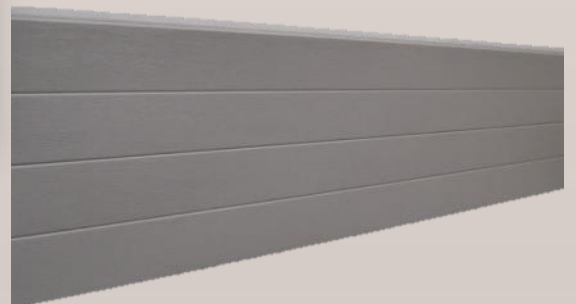

FINELINE PROFILE

Surface Finishes: Woodgrain
Woodtech

A modern style having a very tidy appearance suitable for many situations
0.60mm gauge steel
Available in standard coloursteel colours, powdercoated or zinalume.

PRESSED PANEL

Woodtech (Dark Cedar) (Sectional Doors Only)

Woodtech (Light Cedar) (Sectional Doors Only)

Cedar Doors

All wood doors from Ulti Group are protected with CD-50 sealant inside and out prior to installation to prevent any markings in handling and installation

TG & V CEDAR

A classic timber door available with horizontal or vertical boards.

This style has the options of the following board widths and thickness.

- 87x10mm / 87x20mm

- 127x10mm / 127x20mm

(Borders are also an option)

PLY & BATTEN CEDAR

A stylish door consisting of 6mm Meranti Ply and cedar battens

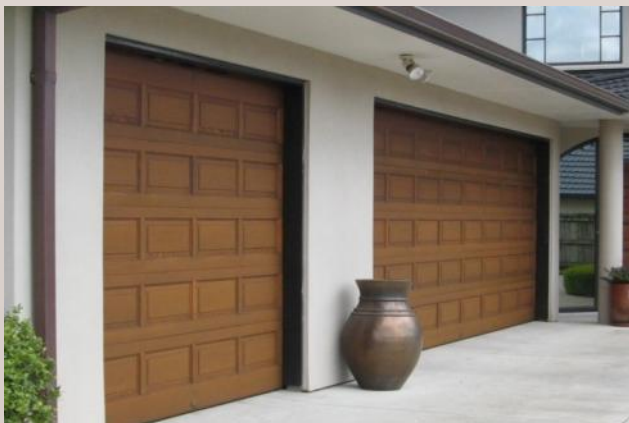

The cedar battens are also available in the following widths and thickness

- 87x10mm / 87x20mm

- 127x10mm / 127x20mm

RAISED PANEL CEDAR

The traditional raised panel look in cedar built on a strong, rigid framework

LOUVRE CEDAR

Profiled cedar boards to create the look of louvers while still being weather tight.

All cedar doors have the option of being painted a colour of your choice or being stained.

Windows are also available on Cedar doors

Insulated Doors

Insulated sectional doors are strong rigid doors which operate quietly. The polyurethane foam filled panels provide excellent sound proofing and temperature control

Insulated sectional doors from Ulti Group include the following

- 50mm thick panels filled with polyurethane foam which fills every gap and bonds to all surfaces
- Standard with a zinalume backing sheet
- The interior of the panel and all hardware can be powdercoated on request
- Smooth finish panel
- Available in coloursteel colours, powdercoated, timbertech or zinalume

FLAT PANEL

V-LINE PANEL

Insulated Doors

Insulated doors are also available in aluminum and copper finishes

RAISED PANEL

RIBBED LINE

NEGATIVE DETAIL

Architectural Designs

Ulti Group offers a large range of architectural garage doors as seen below but there is always the opportunity to create your own door! Provide us with a sketch of the design and specific materials and we will get the door you want.

ALUMINIUM DOORS

These impressive doors are extremely weather resistant and unaffected by corrosion.

All hardware, tracks and hinges can be powdercoated to give extra protection and enhance the interior finish

Available in: Raised Panel Profile | Ribbed Panel Profile | Flush Panel | Flush panel with negative detail | NuWall aluminum cladding | Aluminum Louvers | ACM – Aluminum composite (4mm) | Panoramic with infill panels (glass is an option)

Architectural Designs

CORRUGATED DOORS

Corrugated Doors are designed to meet the current building trends, these doors have a style of their own.

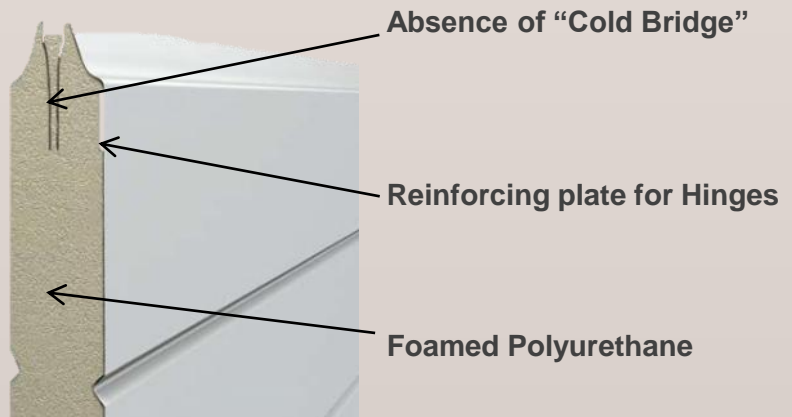

These panel sections have the following benefits unique to corrugated doors :

- No sharp overlap
- No flashings
- No welded steel frame
- Window and glazing options available
- 65mm panel depth

Available in: Galvanized | Zinalume | Aluminum | Coloursteel | Powdercoat colour finish

UNIQUE INSULATED DOORS

Another option Ulti Group offers is our direct imported range of insulated doors with unique styles and superior design. This range of doors are equipped with multistage safety systems, absolute precisely manufactured and can include insulated pass doors and much more.

Or DESIGN YOUR OWN...

Send us a sketch or what you need and we will design a door to suit your application. Some examples maybe;

Timber Designs | Ventilation inserts | Cedar Slats | Stainless Steel | Negative detail panels in varied colours
